

Universal
support frame

Just
enjoy life!

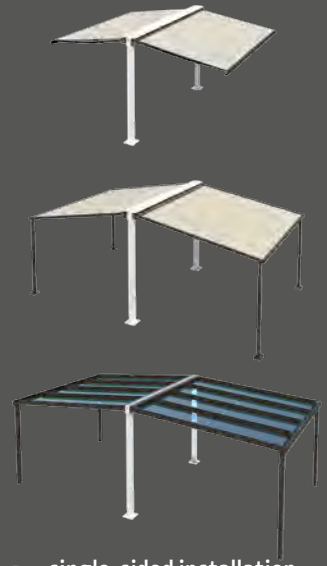

Lewens
MARKISEN

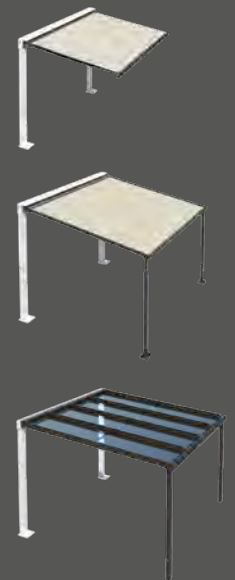

Versatile in combination

- double-sided installation

- single-sided installation

Universal support frame for awnings, pergolas and glass roofs

Optional roof profiles create a rainproof transition to the systems mounted on one or both sides

Sturdy uprights attach the frame to the ground and provide a secure base together with ground foundations

This free-standing structure consisting of a double support frame and four Portofino pergolas creates a shaded, weatherproof space for several guests and large social gatherings.

The universal support frame from Lewens is extremely versatile: pergolas, glass roofs and folding arm awnings can be installed on both sides as a free-standing structure to make optimum use of large spaces and provide maximum weather protection or shade from the sun. Single-sided use of the universal support frame is recommended for walls that are not sufficiently load-bearing, or for peripheral situations without any wall.

When it comes to the secure attachment of support frames and awnings, pergolas or glass roofs, we offer suitable solutions for all our models and a host of construction situations.

Universal support frame
